Jazz

KAHMOTOR
(A MEMBER OF ORIENTAL HOLDINGS BERHAD)

For more information on the all-new Jazz, visit www.honda.com.sg or a **Kah Motor showroom**.
Ubi Showroom, 370 Ubi Road 3, Singapore 408651. Tel 6840 6888. Mon to Sat 9am-8pm, Sun 10am-8pm.
Alexandra Showroom, 255 Alexandra Road, Singapore 159937. Tel 6339 9880. Mon to Sat 9am-8pm, Sun 10am-8pm.

A blue Honda Jazz is shown from a rear three-quarter view, driving on a road that curves under a large cable-stayed bridge. The sky is a clear, bright blue. A thought bubble with a black outline and white interior is positioned to the left of the car, containing the text "Full of Surprises." in a bold, italicized font. The car's rear features include a black Honda emblem, a "Jazz" badge, and a "1.7i" badge. The license plate area also displays "Jazz".

***Full of
Surprises.***

Everything you need in one car.

If you want a little more freedom in your life, maybe it's time to consider a new car. Perhaps you seek something sporty, but still need a spacious cabin. Maybe you desire more power, but also require fuel efficiency. Depending on the day, you may want to drive alone or with a heap of friends. And let's not forget all their luggage. But is it really possible for one car to satisfy all your contradictory needs in terms of design, performance, handling and quality? Well, why not find out for yourself. Just take a ride in the next-generation Jazz.

Sporty yet spacious.

Its sporty lines grab your attention at first glance. The dynamic, forward-shifted body creates a refined, streamlined posture that'll sweep you away to an exciting new adventure. A radically slanted windshield achieves better aerodynamics as well as increases the driver's view. It's a look that captures the eye of every passerby. From its dynamic face to the compact tail, the Jazz imparts a sense of amazing performance and sure-footed agility. Even though it might be sporty on the outside, this little car still manages to be incredibly spacious on the inside.

*Surprisingly
Roomy.*

Sporty yet spacious.

Step inside and discover a wide open space far beyond your expectations. Stretch out, relax and enjoy the remarkably roomy interior made possible by Honda's innovative packaging. There's plenty of legroom and headroom to keep you and your passengers comfortable even on the longest journeys. Enhanced visibility and stylish meters in the instrument panel further enhance your overall driving pleasure. So one thing's for sure, no matter where you go in your new Jazz, you'll always feel comfortable and refreshed.

Efficient use of space.

Honda has provided you with extra space wherever possible, just like the concave side panels that increase the elbowroom in the front and rear. Every inch of the cabin has been refined to liberate, comfort and please.

Actual equipment may vary from picture shown.

*Surprisingly
Powerful.*

Powerful yet efficient.

The new Jazz proves that small cars can still deliver exceptional driving pleasure even during long distances. When the highway demands acceleration, simply press the pedal and Honda's new, spirited i-VTEC engine, (100ps 1.3L or 120ps 1.5L i-VTEC available), responds with instant exhilaration. On automatic models, the 5-speed automatic transmission is matched with paddle shifters at your finger tips, making every journey in the Jazz a pleasure no other car can match or offer. Advanced technology also delivers class-leading economy, so you don't have to keep stopping for fuel along the way. This is a breakthrough combination of extraordinary fuel efficiency and excitement.

Actual equipment may vary from picture shown.

Enjoy an amazing 384 liters* of rear cargo space — even when carrying five adults.

The low rear opening simplifies loading and unloading of any cargo.

Comfortable yet versatile.

The Jazz clearly demonstrates that supreme comfort and versatility can coexist in a small vehicle, even on extended journeys. It's thanks to the large supportive seats equipped with a ratchet-style seat height adjuster. The sporty 3-spoke steering wheel adjusts not only for height but telescopically for reach too. It is so easy to find a comfortable driving position to enjoy the incredibly quiet ride. When you need extra cargo space, the ingenious ULTRA seats let you totally reconfigure the cabin.

ULTRA seat

The Jazz provides all the versatility you could hope for, and more. Simply arrange the seating with a swift, single-action to meet your changing needs.

ULTRA versatility

Honda ULTRA seats are truly revolutionary. Not only do they fold flat with a single pull, but their lower cushion can also be folded up to make room for tall items. Best of all, there's no compromise in passenger comfort. It's the ultimate in seating flexibility.

* VDA measurement

Utility mode

Lower both rear seats to maximise the cargo area. Even large items like bicycles can easily be stored on the fully flat floor.

Long mode

Recline a front and rear seat to create a long storage space. Items such as surfboards can be loaded with ease.

Tall mode

Fold up a rear cushion to create a storage area that's perfect for taller objects, such as pot plants and shrubs. The rear cargo area remains unchanged so it can be used for other purposes.

Refresh mode

At rest stops, recline the front seats with their headrests removed to create a perfect space to relax.

Actual equipment may vary from picture shown.

Surprisingly Agile.

Actual equipment may vary from picture shown.

Who says small cars must have small cargo areas? The Jazz offers a remarkable amount of space for passengers and cargo, yet it's the perfect size for driving along narrow streets.

Effortless parallel parking

Compact dimensions combined with nimble handling, increased visibility and a trimmed corner bumper make parking a breeze, even in small spaces. You'll also appreciate its smooth, agile handling on narrow city streets.

Super easy U-turns

Simply turn the steering wheel and the Jazz smoothly complies. You'll notice the difference, especially when making U-turns.

Minimum turning radius 4.9m

A place for everything.

Satisfy every storage need with pockets, compartments, and even ten drink holders.

- 1 Ticket holder on driver's sun visor
- 2 Upper glove box with pen holder and instrument panel tray
- 3 Front door drink holder
- 4 Rear door drink holder
- 5 Dashboard drink holder
- 6 Seat underbox (rear left seat) for user manuals and documents
- 7 Center console pockets
- 8 Front console box with dividers for small items and drinks
- 9 Lower glove box with card holder
- 10 Seatback pocket (passenger's seat) for maps and magazines
- 11 Rear central drink holder
- 12 Rear trunk cover to keep your belongings safely out of sight

Actual equipment may vary from picture shown.

Honda quality and safety.

Honda's renowned quality is evident in every detail, from the design of small components, the texture of fabrics and the use of advanced safety technology usually reserved for larger, high-status vehicles. And of course, exceptional environmental performance is always part of every Honda vehicle.

Safety

The Jazz helps avoid any accidents by keeping you in constant control with clear visibility, responsive acceleration, agile handling and outstanding braking performance. Honda's Anti-lock Braking System, brake assist and a high-mounted back brake light further contribute to overall safety. In the event of an accident, advanced safety features and solid body construction based on Honda's G-Force Control technology, help protect you and your passengers. So there's no doubt that in the new Honda Jazz, you'll always have total peace of mind.

Clear all-round visibility

Blind spots are minimised thanks to its large front triangular windows, large door mirrors, and lower headrests. You can see the world around you and respond instantly.

Standard ABS

Large diameter 14" front disc and 13" rear disc brakes coupled with Honda ABS (Anti-lock Braking System) help prevent the wheels from locking in emergency braking situations and on slippery roads. It also increases vehicle stability and control during deceleration to help you avoid accidents.

G-Force Control technology

Honda's original technology to control various forces (G) that are generated upon impact in order to reduce injury.

Technologies for minimising injuries to occupants

- Collision safety body
 - Controls forces exerted on the car's body upon impact and reduces injuries to occupants.
- Occupant restraint system
 - Controls the collision force transferred from the car's body to occupants (through the use of seatbelts and airbags), thus helping to improve protection and minimise injury.

Technologies for minimising injuries to pedestrians

- Pedestrian injury reduction
 - Controls forces (G) transferred upon impact from the car's body to pedestrians and helps reduce injuries.

Protective body construction

The highly protective body, which has been refined using Honda's G-Force Control technology, effectively absorbs the force of impact in collisions. This was proven through extensive crash testing. The body is also crash-compatible with other vehicles, thus reducing damage to both vehicles in a car-to-car collision.

Proven real-world protection

The Jazz was extensively crash-tested at Honda's exclusive Real World Crash Test Facility to ensure excellent protection in car-to-car collisions.

Pedestrian safety features

Honda's comprehensive approach to safety includes enhanced pedestrian protection in the event of an accident through various impact-absorbing front components.

- Impact-absorbing hood
- Impact-absorbing hood hinges
- Impact-absorbing front fenders
- Impact-absorbing wipers
- Impact-absorbing bumpers

Standard front airbags

In a frontal impact, the front airbags instantly inflate and deflate to reduce injury to the driver and front passenger.

Front 3-point ELR safety belts

The pretensioner tightens to prevent the passenger's chest moving forward. The load limiter limits excessive pressure on the chest. The Honda Jazz is also equipped with a centre 3-point seat belt at the rear.

Enhanced eco-friendly performance.

Tuned for cleaner emissions

The linear air-fuel (LAF) ratio sensor and O₂ sensor, in addition to the newly adopted aero-flow sensor, provide a more precisely controlled air-fuel ratio. Emissions are therefore cleaner and catalytic converter usage of precious metal is reduced.

Less environmental impact

Honda is always striving to find new ways to help minimise its impact on the environment. So when it comes to component materials, Honda was able to further reduce the percentage of harmful substances such as lead, chromium hexavalent, cadmium, and polyvinyl chloride (PVC).

Actual equipment may vary from picture shown.

Dreams do come true.

What if there was a car that only emitted water?

Obviously the world would be a better place and the good news is, such a car already exists: The FCX Clarity. It works by converting hydrogen into electricity, which leaves you with only one emission, H₂O. And in 2008, this totally new fuel-cell vehicle will be in production.

What if a plane had its engines mounted on top of the wing?

Well, it would be a world-first and it would be called the HondaJet. Secondly, the engines would have to be in a special position on the wing we call 'The Sweet Spot'. That would then result in less drag at high speeds, 30% better fuel economy and because there is no need for structural engine mounts on the fuselage, 30% more cabin space.

What if we had our own solar cell production company?

In recent times Honda has branched out into mass solar cell production. Honda's unique C.I.G.S solar cell produces the highest level of conversion efficiency in the thin film category and only requires half the energy to manufacture, so it's environmentally friendly throughout its entire life. Why does a vehicle company produce solar cells? Purely so we know that we are doing everything possible to help prevent global warming.

What if we tested our new technologies in the most extreme conditions possible?

At Honda we have always believed that racing is fundamental to our development. As our founder Soichiro Honda famously said "Without racing, there is no Honda". A statement that will always hold true. It's the ultimate testing ground and regardless of whether we win or lose, the same question is always asked – how can we improve performance? And you can be sure that for every improvement made on the track, there is an equal improvement made to every Honda vehicle that hits the road.

What if our technology was more ... alive?

ASIMO, the World's Most Advanced Humanoid Robot, was born from a dream to create a robot that could benefit people in everyday life. His name stands for Advanced Step in Innovative MObility, a title he's definitely worthy of. Currently ASIMO's capabilities include: running at 6 km/h, walking on uneven surfaces, turning smoothly, climbing stairs, pushing a cart, receiving and delivering trays and he can even dance a little boogie if the occasion calls for it. Our dream is that one day, everyone will have an ASIMO of their own to help around the home or office.

Selling you a Honda is just the beginning of a long-term relationship.

Who else takes care of your Honda like one of its own? Only Kah Motor provides you with the full-fledged services you deserve when you invest in Honda. That's great peace of mind for you.

No one understands a Honda the way Kah motor does. The official sole distributor of the premium car brand for more than 30 years in Singapore, Kah Motor is committed to keeping your Honda in tip-top condition, day after day, year after year, on the roads.

Just as you demand the best performance from your Honda, expect only the most comprehensive services from Kah Motor, with reliable pre and post-sales service of the highest quality. Choosing a Honda is already a wise decision. Now, you can repeat that good judgement by choosing Kah Motor.

Why Kah Motor gives your Honda a better resale value and a longer car life.

1. Exclusive after-sales services. Only when you opt for Kah Motor will you be entitled to the superior after-sales services devoted to your Honda. Enjoy the additional peace of mind knowing that your Honda will be in the hands of people that understand what's best.

2. Reliable warranty from the manufacturer. The warranty coverage for your Honda is 3 years or 100,000 km, whichever comes first. In the short term, it is more convenient for your service needs. Over time, it just means improved life span for your car.

3. Proprietary servicing equipment. Your Honda will be handled only with authentic, top-notch equipment from Honda Japan. The Honda Diagnostic Equipment will efficiently isolate any malfunction for swift rectification. Specially designed tools used will prevent damage to components that may be costly to replace.

4. Specialised care. Our team of 198 Honda experts from Kah Motor Service Division is at your service. These specialists undergo relentless technical upgrades under the Honda Individualistic Skill Training (IST) programme. They will recommend the best preventive measures for your car to save you from hefty bills in the future.

5. Genuine components. No corners are cut as all the parts used at the Kah Motor service centres are 100% genuine and of the highest quality. The components, which provide the best fit and performance, are manufactured especially for Honda vehicles.

6. Round-the-clock assistance. With 24-hour breakdown and towing services from Kah Motor, your needs will be attended to any time of the day.

7. Islandwide network. Six strategically located service centres and two Body Repair & Paint Shops ensure that your Honda will be promptly serviced at your convenience.

8. Higher resale value. All these add up to a higher price you can fetch for your Honda in the resale market, should you decide to transfer ownership.
